

BATES WATER SOLUTIONS, INC.

Challenge Us. We Solve Water Equipment Issues.
Go Green Technology
Women-Owned Business Enterprise

Dirty water in your hot/cold closed loop system? Dirty water in your cooling tower /chiller? Clean it and extend filter life!

Your filters can remove only so much suspended solids before they become ineffective and need frequent replacements.

Let **Bates Water Solutions** provide a complete cleaning of your hot and cold - open or closed loop water systems.

Our **BWS54 Portable** Filtering Systems can remove particles down to the .025 micron range which can result in the following benefits:

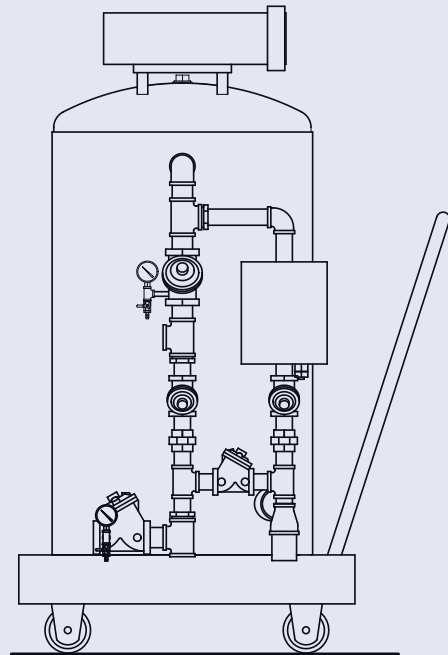

Benefits for Cooling Towers

1. Sump cleaning is virtually eliminated.
2. No more nozzles or strainers blocked.
3. Pump seals last longer.
4. Longer lasting filters.

Benefits for Chillers or Heat Exchangers

1. Higher energy transfer efficiency - clean surfaces.
2. Adequate temperature of chilled and condenser water for proper chiller or process operation.
3. Increased output due to better cooling.
4. Longer lasting filters.

Maximum Use of Chemicals - Your chemicals will work better because suspended solids will not interfere with the treatment. Fouling is also reduced.

BWS54 Portable filtering system.

We connect our filtering system to your equipment. Your water will be filtered until the desired level of filtering has been obtained.

Contact us for a "no obligation" price quote that is designed for your unique situation.

We provide water solution services and products to Illinois, Indiana, Iowa, Kentucky, Michigan, Missouri, Wisconsin and nearby states.
