## "Crystal Clear"

### Whole House Water Purification System

***Eliminate plastic water bottles destined for a landfill.  
Families now want purified water from all household faucets.  
Ad-on devices are too much trouble to maintain.  
We need a complete whole house filtration system!***

There are many devices available for water purification. Single use devices can be installed under your kitchen sink, on the countertop, in the refrigerator and where ever pure water is needed.

With the "Bates Crystal Clear" water purification system installed in your house, you can forget all of those ad-ons. When the water enters your house, pure water is provided with one whole house system.

If your water is supplied from a well, river, lake or just from your city, our system can handle it. "Water in" and "Pure water out" - its just that simple, one complete self-cleaning purification system.

Our filtration membrane system blocks out the "bad and the ugly" and only lets in the "good" pure water. Parasites, viruses and most bacteria are left out in the cold. Fluoride, that your municipality has added, is also eliminated. Add an active carbon filter for Chlorine removal.

Your only requirement is to have an annual system maintenance. (depending on water source quality)

Your existing water pressure drives the system . . . not electricity. In the event you lose power, you still have pure water. During the self cleaning cycle (approx. 10 min), electricity will be required.

# ***Bates Crystal Clear Whole House Water Purification System . . . What are the benefits, how does it work, why should I invest in this system and what will it cost?***

## **Benefits**

We have all heard the "Drink up to 8 glasses of water a day" phrase at one time or another, but if your water has an unpleasant taste, you probably ignore that rule.

Soft drinks, bottled water or other liquids for refreshment generally replace your "8 glasses of water".

With good tasting *Crystal Clear* water available you will drink more water and at the same time rid your body of toxins.

When your body is fully hydrated, you will generally have more energy.

When it comes to tea, coffee and other mixed beverages that use water, bad tasting water makes average drinks and pure *Crystal Clear* water makes great tasting and flavorful ones.

*Crystal Clear* water also make ice cubes last longer and with no after-taste remaining in you glass.

Cooking with *Crystal Clear* water lets the natural flavors of vegetables and soups, really get to your taste buds, rather than be masked by bad water.

All of these benefits are provided without harmful chemicals being added.

## **Bates Crystal Clear** *(How does it work)*

The membrane fiber system is the "Doorman" to your *Crystal Clear* water purification system. This is where water is made pure by keeping out the metals, salts, micro-organisms and organic matter to name a few. Your house water pressure forces the source water through this membrane fiber system, which then delivers the *Crystal Clear* water to you, where it is needed. The impurities that are left behind are washed away during the daily self-cleaning cycle.

Here is a simple explanation of how this process works:

The size of the water molecule is forced to pass through the membrane fiber system, while the contaminate molecules are too large to pass through and are flushed away during the daily self-cleaning cycle.

Using the Bates *Crystal Clear* Whole House Purification System the following if present in your water source, are removed: Salt, Chlorine, Cysts, Parasites, Bacteria, Large organic molecules (pesticides), Tastes and Odors.

## **Investment**

When we think about protecting the things that we own, many methods are available – car and house insurance, life and health insurance as well as burglar and smoke alarms, carbon monoxide detectors to name a few. But what about the water "enemies" that enter your home every single day – disguised as bad tasting water with all of the other harmful ingredients ? This is where your pure water "insurance" comes into play with the Bates *Crystal Clear* Purification System. This systems helps your health as well as your whole family – the most important assets you have!

## **What will it cost**

Since there are many variables, costs will vary based upon your needs (how much water you will require), the quality of your water source, size of equipment required and other factors. There will be the initial cost of the equipment and installation and yearly maintenance fee. During water purification, there will be no wasted water created. Your will get *Crystal Clear* water on demand based on your water pressure. The only electricity that is used, will be during the daily self-cleaning 10 minute cycle.

Setup an appointment today, to evaluate your future Bates *Crystal Clear* Water Purification System.

### **Specifications:**

Maximum peak flow rate	Up to 11 Gal.	Controller Voltage (VAC)	120 / 230
Maximum continuous flow rate	4.5 Gal.	Bacteria Removal	99.99%
Minimum temperature	>32° F	Virus Removal	99.99%
Maximum temperature	<100° F	Cyst Removal	99.95%
Maximum ambient temperature	140°F	Parasite Removal	99.95%
Approximate flush volume	12 Gal.	Footprint (vertical mount)	18" x 18"
Typical system efficiency	95%	Footprint (horizontal mount)	24" x 74"
